[CO Animas standards summary table.docx](#)  
[wqcd\\_animas\\_impairments.xlsx](#)  
[gold king sample sites CO segments 081215.pdf](#)

Do you want me to boil this down or should we just refer them to the state? I'm trying to summarize but – ugh.

Lisa,

I've attached several files to describe the segments, uses, and impairment status. We have more

lengthy table for the WQS if you want that. It would be best to meet with me and Maggie if you want the WQS details.

My map has sampling sites, too. Let me know if you want the segments by themselves. Segment 3b is in between 3a/7 and 4a. The current uses don't include aquatic life so, the impairments for 3b are old and covered by the TMDL.

Call me for any needed clarification.

**Subject:** Request for Info for Animas

Hi Karl, just got a call from Lisa MV. She's looking for information on the wqs and impairment status of the Animas to respond to an information request.

Could you check in with her to make sure she gets what she needs? Here's the general idea of the information request:

Map of segments

WQS that apply per segment

Designated uses that apply

Impairment status prior to release

I think instead of providing the equations for the criteria, you could just list the contaminants for which the state has stds and impairment status of each segment for the particular uses.

I think you already have this pulled together; but, if you need assistance just let me know.

Thanks!
